# 1. Project Summary

## 1.1 Project Overview

Our school website is a great solution for new users to come in contact with the school and know more about it. Our website is a web-based app which is easy to use, and its main goal and purpose is to increase the overall image and reputation of our school which can lead to increased admissions.

## 1.2 Project Scope

The web application provides a digital platform for the school to promote and showcase the institutions achievements and facilities. Upon entering the website, the users can inform themselves about the school and its history. The users can access the school's public gallery and view the school's recent activities. The users inform themselves about the school's vision and mission. If the Users have any inquiries about the school, the enquire and the FAQ feature is there to assist them. We believe that most of the user demographics would contain mostly aspiring students and their parents. The users can also access:

- The school gallery
- Location and contact info of the school
- Student statistics
- Sports facilities
- Academic achievements
- Achievements and Events
- Honours and Awards received by the school
- About the founders and the faculty

## 2.0 General Description

The school website is a website built, designed, and maintained by a school or it's contracted clients (hypothetically here we are the clients). In many legislations, school are required to make some information public while some should remain undisclosed. In the case of this website the client (the school) is responsible for maintaining the content; adding new content and changing elements of the visual design, while the users to the site cannot make these changes but can

accesses the site to read the content. The school website features are there only to inform the users about the schools and cannot access the website's database.

## 2.1 Product Functions Overview

**Types of users/actors**

1. **Admin**
2. **Student/Parents**

**Admin features**

1. Can update the content of the website.
2. Can include new features to the website

**Student features/parents:**

The users except the client cannot in any way alter the content and or have any access to any website database. Therefore, the features are only read only:

1. Can access the enquire page
2. Can view the school gallery
3. Can view the school syllabus
4. Can view the school academic calendar

## 2.2 User interface Design

**(all pages are for illustrative purpose only actual output may differ slightly)**
**Single page Website**
**Main page-**

(visible to both user and admin)
